## FUNDAMENTAL DIFFERENCE

Although HighMatch and TestGorilla both provide assessments for **cognitive aptitude**, **personality**, and **skills**, our approach to test development is very different.

HighMatch carefully crafts and designs **assessments with quality and accuracy in mind.** They are reviewed rigorously by our licensed I-O psychologists to ensure the **results are predictive of performance and role-specific to minimize potential bias**. TestGorilla offers brief, surface-level assessments that provide much less insight into your candidates' potential and involve minimal user customization or adaptability.

RESULTS MATTER

Test accuracy and quality are equally important when it comes to delivering actionable results. HighMatch clients rated our solution **higher** than TestGorilla clients rated theirs **across almost every category in G2**, the leading software review website.
